

you; it is the season of ardent emotion and the pure ideal. The form of abstract and perfect beauty captivates you. Unchecked by any contradictory experiences of life, you look and you love. You are now open to impressions; your affections are warm and tender; your mind is quick to apprehend and to feel; your senses are awake; you are full of kindness and sympathy. The pleasures of imagination play around your heart; the thrill of joy is exquisite; and hope, bright hope, is beckoning you onward. Buckle on, then, your armour anew, and go forth to battle and to win. Set for yourselves a standard of perfect integrity and unflinching industry. Be true to yourselves. And eyes are upon you—warm hearts are near you. The hopes of good men are in you. From you and such as you, the next generation will take its stamp. The old North State is calling to you. (Old) Now is depending on you. Rise up then to the high demands of parents, friends and country. Shake off ignominy. Despise low vice. Beneath you are all artifice and low cunning. Step forward in the simple spirit of truth, take it in your hands—bear it humbly, but bear it nobly. Let all your aims be high and your determination steady. Ever remembering, in youth bright lexicon, there is no such word as fail—and adopt as your motto, that of the Empire State of Union, "Excelsior."

The Great Northern and Southern Mills.

In May, 1858, the Department entered into an arrangement with the proprietors of the route "through the States of Louisiana, Mississippi, Alabama, Tennessee and Virginia," for the transportation of the local and through mails between New Orleans and Washington, on the route of the line, the service to be performed by the schedule proposed by the parties, according to which the trip, each way, between New Orleans and Washington, was to be performed within 4½ days, or 5 days between New Orleans and New York. The service under this arrangement went into operation on the 1st of July, 1858. But of 220 mails sent by this route from N. York to N. From Denver City.

St. Louis, Aug. 16.—The Denver City Express of the 8th inst., has arrived at Leavenworth. A nugget weighing 56 pennyweights had been taken in Nevada gulch. Rich diggings had been discovered at the head waters of Bayou Salado. The convention in session at Aurora had adjourned, having framed a State constitution. The features of the document are not given. The boundaries are latitude 37 to 43 degs., and longitude 102 to 110 degs. A division of sentiment as to the propriety of a State organization existed, and the convention submitted the question of territorial or State organization to the people at the same time.

Destructive Fire.

WASHINGTON, Aug. 16th.—The extensive machine, blacksmith and sawing shops of the Capitol extension work, were burnt at half-past 3 o'clock this morning. The origin of the fire has not been ascertained, but it is supposed to have been accidental. The buildings were comparatively valuable, but the machinery was very expensive, including a lathe for turning immense stone columns for the public buildings, powerful engines, tools and costly marble, finished and unfinished. The whole was uninsured. The loss is variously estimated at \$50,000 to \$60,000.

The Result in the First District.

May be briefly summed up in the announcement that Wm. N. H. Smith, Esq., the Opposition candidate for Congress, has been elected by a majority of about five hundred votes. Hon. H. M. Shaw of course has been defeated by the same majority. Under ordinary circumstances we should bow in silence to the result, but the manner in which the election was carried out, and the manner in which the result was announced, are matters of some importance. The election was carried out in a manner which was entirely fair and honest, and the result was announced in a manner which was entirely fair and honest. From Washington.

WASHINGTON, August 15.—Professor Alexander Dimitry, a translator of the State Department, was appointed today by the President minister to Nicaragua, and will leave here at an early day for Central America. The statement of the London Herald that our government has officially notified that of her Majesty that the United States have resolved to abstain from interfering in a portion of maritime law agreed upon at the Congress of Paris in 1856 is strictly entirely without foundation. The administration strictly insists on its retention.

At Tampico, on the 3d inst., all was quiet. Seven hundred and sixty thousand dollars in specie was on hand from the Brazos.

Battle Between the Sioux and Arikapah Indians. St. Louis, Aug. 14.—The steamer *Spread Eagle*, with 75 U. S. soldiers from Fort Randolph, arrived at St. Joseph on Friday evening, from a point 80 miles above the mouth of the Yellow Stone.

The officers report that a sanguinary battle occurred between the Sioux and Arikapahs on the 22d of July, resulting in the loss of 33 of the former, and 16 of the latter. Another battle was reported, which it was thought would result in the extermination of the weaker party.

The steamer *Spread Eagle* went 450 miles higher up the Missouri than was ever before reached by a steamboat.

THE DEBT OF INDIA.—The amount of the debt of India, on the 1st of May, 1858, is returned at the sum £60,704,061—of which £53,165,605 was "registered" debt, and the rest floating.

ARMING ENGLISHMEN AS RIFLEMEN.—It would appear that the English press is making itself merry with the project of placing rifles in the hands of the English people, so as to convert them into a nation of sharpshooters, as the enjoiner, from a Liverpool journal, will show:

We presume that we have heard the last—for the present, at least—of the cry of "rifle men form," which Mr. Tenneyson did his best to carry out. In this and other towns the failure was ludicrous, a sad caricature on the fire and enthusiasm of the poet, and as Louis Napoleon, in deference to our fears, has now engaged to disarm the spasmodic effort to transform us into a nation of sharpshooters, will speedily be forgotten.

Nervethless, a sanguine gentleman, Mr. Keith Leslie, from the northern part of the island, has been striving to persuade a London morning contemporary of the ease with which the Government, by the distribution of £25,000 a year, in the shape of prizes, might secure a million of riflemen equal to the peasants of the Tyrol—those unerring marksmen who made such havoc with the French and Sardinian officers in the late war. Mr. Keith Leslie's occupation, like Othello's, is now gone.

THE ATLANTIC TELEGRAPH.—The English papers say the Atlantic Telegraph Company has decided to make the next cable of six copper wires, twisted about 6 times the size of the old one. There is to be no outside covering of iron wire, except for a few hundred miles near the terminus. It is expected to be in order for business early next summer.

DIED.

Departed this life, Tuesday, the 9th inst., at his residence in Duplin county, Mr. TIMOTHY NEWKIRK, Sr., aged 67 years.

The deceased was highly respected for his many good qualities; in him the poor had a friend, while none knew him better than to render him aid. In truth, it may well be said, that he died without an enemy. But few that succeeded better in acquiring the surplus of this world's means and his, than he. He was a man of great benevolence, and his neighbors, who will long cherish his remembrance, grateful.
